## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 23-28 and 35-39 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches a method of fabricating a liquid crystal display comprising various steps as claimed, more specifically, as the following:

patterning the protective layer and the gate insulating layer to expose the drain electrode and to form a protrusion comprising the gate insulating layer and the protective layer; and patterning the transparent pixel electrode covering the protrusion and forming an opening in the pixel electrode so as to divide the pixel region into a plurality of domains as shown in Fig.8 [claims 23 and 35].

The closest reference US 6,278,503 (Nishikawa et al) discloses that forming a protrusion having two interlayer insulating film and pixel electrode covering the side of the protrusion, but the filing date is later than the priority date of this application (applicant filed English translation of the priority document). The prior art of record do not show the inventive feature as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2871
